Road Assistant Diagnostic
Rayan Khodro RAD300, Standalone OBDII/EOBD Vocal Car Diagnostic Tool

Rayan Khodro RAD300 Vocal OBDII Scanner is a device that communicates with vehicles in order to perform every essential and necessary diagnostic procedure. It does this all while easily informing the user of every function vocally.

Checks Readiness Monitors! perfect for **Smog Test!**

It vocalizes all OBD standard and Manufacturer DTC + Readiness monitors & provides all owners & technicians with a convenient tool for reading & erasing fault codes.

Check diagnostic codes yourself and make the most informed and money-saving repair decisions.

RAD300 is a hassle free, stand-alone automatic product that DOES NOT need to connect to any third-party devices, such as laptops or cell-phones.

No need for any batteries or charging. Gets power directly from vehicle!

Overview:

- RAD300 's built-in DTC library allows you to accurately determine causes of trouble through its communication with over 5000 universal and Manufacturer specified codes.
- This device will ultimately save you tons of money and ensures peace of mind over your vehicle.
- Perfect for private car owners, DIY car enthusiasts, and car repair shops.
- RAD300 is durable enough to last for years.
- 30 days MONEY BACK GUARANTEED.
- A two year FREE WARRANTY provided by RayanKhodro.

RAD300 OBDII Diagnostic tool allows you to self-diagnose issues with your vehicle, therefore you know what needs to be done next time you visit a mechanic. The readiness status allows inspectors to determine if the vehicle's OBDII system has evaluated all the components and systems.
